Annual Report of the Public Health Inspector for the year, 1958

To the Chairman and Members of the Health Committee
of the Urban District Council

Gentlemen,

I have much pleasure in submitting to you my
fourteenth Annual Report.

The work of slum clearance continues and during the
year 8 Demolition Orders and 6 Closing Orders were made.

The repair and modernisation of No. 11, Major Street,
has been completed and the house occupied.

This now completes the scheme for the modernisation
of 11 houses in Major Street.

The present housing position in the district is:

The total number of premises with living accommodation
is 3,083, made up as follows:-

Houses owned by the Council	865
Owner occupier	790
Rented houses	<u>1221</u>
	2876
Shops and dwellinghouses	106
Farms	81
Public Houses	<u>20</u>
	<u>3083</u>

Of the 2,876 dwellinghouses, 160 are back to back.

The percentage of Council houses to total dwellinghouses is	30.08%
The percentage of Council Houses to rented houses is	41.46%
The estimated population is	8410
The Estimated number of persons per house is	2.72
The estimated number of persons housed in Council houses is	2360
The estimated number of persons housed in owner occupier houses is	2157
The estimated number of persons housed in rented houses is	3331
The estimated number of persons housed in shops & dwellinghouses is	288
The estimated number of persons housed at farms is	220
The estimated number of persons housed at Public Houses is	<u>54</u>
	<u>8410</u>

Since 1945, the Council have built:

3 bedroom houses	118
2 bedroom houses	102
2 bedroom Flats	18
1 bedroom Flats	18
Single person flats	18
Bungalows	25
Prefabricated dwellings	<u>20</u>
	319

Bungalows in course of construction 23

The number of private houses built since 1945, 40

During the same period, 43 Closing Orders and 52 Demolition Orders have been made.

66 applications for Improvement Grants under the Housing Act, 1949, have been granted:

17 in respect of rented dwellings
49 in respect of owner occupier

It will be noted that the greater number of Improvement Grants have been made to owner-occupiers and it is regretted that more owners of rented houses have not taken advantage of the grant.

The Council have carried out the modernisation of 11 houses in Major Street and 1 in Ashes Lane, making a total of 78 houses provided with modern amenities.

In the past few years, many of the older houses have been repaired, new fireplaces and sinks provided with geyzers, but not modernised.

These improvements and repairs have given these dwellinghouses a further lease of life.

Since the Rent Act, 1957 came into force, many repairs have been carried out to property and it is hoped that with the rent increases, owners will now keep their property in a better state of repair.

The number of applicants on the list for Council houses, is 240.

47, Insufficient bedroom accommodation,
193, Sufficient bedroom accommodation.

None of the applicants are overcrowded according to the Housing Act Standard.

The five year slum clearance programme which was submitted to the Ministry in 1955 has now been completed.

Clean Air Act, 1956

Consideration has been given to the provision of Smoke Control Areas and a scheme for the progressive application to cover the major portion of the district, has been prepared.

The most suitable areas for conversion to Smoke Control areas are areas containing Council housing estates, as these are the only parts of the district in which there is any depth of development.

Of the 847 Council houses only 152 have gas installed and could be adapted for smokeless ignition of smokeless fuels.

The remaining 695 Council houses are all electric.

This creates the problem of smokeless ignition of the fuels. The North Western Electricity Board are carrying out experiments to try to provide electrical ignition of smokeless fuels and if this can be achieved it will simplify the creation of Smoke Control Areas where the houses are all electric.
